

## **Schedule and Route Information**

### **301- Lintuhytti - Hervantajärvi**

Line 301 is a robot bus operating on the route Lintuhytti – Hervantajärvi. The journey takes approximately 8 minutes.

### **Transfer connection**

Tram line 3 Hervanta - Hakametsä - Sorin aukio, stop: the connecting stop is Hervantajärvi A 0839.

### **Tickets**

The trip is subject to a fare (Standard AB zone fare)

### **Timetables**

Operating hours:

Monday to Friday: 6:00–23:00

Saturday and Sunday: 9:00–22:00

Service frequency: 2 trips per hour per direction.

This is a pilot project starting on 17 November, 2025.

### **Additional Information**

The bus has 12 seats and no standing places. The use of seat belts is mandatory.

**Accessibility:** The bus can accommodate a stroller or a standard wheelchair. For safety reasons (due to weight limits), electric wheelchairs are not transported.

**Safety:** A safety operator and surveillance cameras are present on board. The safety operator will be removed in a later phase of the pilot. After that, the bus will be monitored remotely from a control center.

The maximum speed of the robot bus is 25 km/h. Driving speed depends on the section of the route, conditions, and other road users. The bus navigates a predefined route using sensors, continuously observing its surroundings and obstacles. When an obstacle is detected, the bus will either stop, bypass the obstacle autonomously, or request the safety operator to authorize the maneuver.

### **Disruptions**

- Robot bus services are replaced by a regular minibus during charging breaks and service disruptions.
- The robot bus does not operate on public holidays or on Christmas Eve, 24 December 25
