

## 3D printed electronics system

Rapid prototyping system for 3D printed electronics.

### Neotech PJ15X BT 3D printer

- Combines multiple printing technology with 5-axis motion control enabling complex 3D printing
- Suited for a wide range of R&D, prototyping and product development operations
- Motion Range 400-300-140mm (X-Y-Z)
- Single and two component dispense heads
- High viscosity piezo jet head
- NanoJet aerosol print system - line printing to 20  $\mu\text{m}$
- 3D printing FDM module
